NOEL AMA

I'm a multi disciplinary developer, who specializes in building (and occasionally designing) exceptional digital experiences

Through the next couple of slides you'll be getting to know me a bit and see some of my work. Thanks for the time.

I am running out of things to say and it's only the first page. God help me through the rest of this portfolio.

Y'know what? Let's just get on with this. No one's going to read this bullshit anyways. It's just here to fill up space.

INTRODUCTION

Hello! My name is Noel and I enjoy creating things that live on the internet. My interest in web development started back in 2011 when my dad brought in our first PC back home... turns out I really enjoyed creating a little custom webpage, which in turn taught me a lot about HTML & CSS.

Fast-forward to today, and I've had the privilege of working on some amazing projects at freelance level and student-led design projects.

Here are a few technologies I'm experienced with and have been working with recently:

NodeJS	Flutter (Dart)	Javascript (ES6)	Typescript
Prisma	Express	Docker	Jest

BRIDGE3D

On this project, I was contracted to work on a 3D facility map that would be responsible for creating allocations, and creating entry points for generating the metadata required to make database entries for 12,006 shops

Typescript
React
Nginx
MySQL
